

CIRCULAR CORTEN STEEL EDGING

Our circular corten steel edging is 3 mm thick and available in three different diameters. It is stronger than most corten steel edging on the market. It is normally used in gardening to create tree wells or circular flower beds with different materials.

It can be installed without burying thanks to its anchor stake design, giving you height in the garden.

DATA SHEET

MATERIAL	Corten steel
MEDIDAS	60mm Ø 80mm Ø 100mm Ø
COLOUR	Rust brown
PESO	5kg (60mm Ø) 6kg (80mm Ø) 7,5 kg (100mm Ø)
ACCESSORIES	3 nails plus coupler (possibility of additional nails)

EDGING PLACEMENT

Its concealed connection system leaves the exposed face with a completely clean and continuous finish. The 3 mm thick sheet used gives it robustness.

QUALITY COMMITMENT

Edgeering products are manufactured in Europe, respecting the environment and the human rights of workers. Edgeering guarantees that the product will not break or deteriorate provided it is installed according to the recommendations included in this data sheet and used for its intended purpose.
